

ARCHITAS FLEXIBLE EQUITY

FUND FACTSHEET

AUGUST 2023

Page 1 / 3

Important notes:

- This Fund invests primarily in a diversified range of equity investments, in particular, by way of investment in other collective investment schemes.
- This Fund is subject to the following key risk factors: risk relating to dynamic asset allocation, risk of investing in other collective investment schemes, index fund risk, Eurozone risk, emerging markets risk, equity risk, small-cap and/or mid-cap company risk, and currency risk.
- Investors should not make investment decisions based on this document alone and should read the offering document (comprising the Prospectus, Supplements, Hong Kong Covering Document and Product Key Facts Statement of the Fund) for details including risk factors.
- Before you decide to invest, make sure the intermediary has explained to you that the Fund is suitable for you.

Investment Objective and Policy Summary

The investment objective of the Fund is to seek to achieve a return for investors over the medium to long term based on a combination of capital growth and income and with a medium to high volatility level mainly through exposure to a diversified range of equity sub-asset classes. The fund intends to hold a minimum of 50% and less than 100% of its Net Asset Value in Collective Investment Schemes (CIS). The CIS in which the Fund will invest will have a range of underlying investments which may reflect

exposure to equities and/or equity-related securities, money market instruments, financial derivative instruments, financial indices and/or currencies. In addition to investment in CIS, the Fund may invest directly in equities, units or shares of Real Estate Investment Trusts and equity-related securities. Investments will be made following qualitative and quantitative assessments that are determined by the Manager and based on the Manager's views as to an appropriate allocation strategy.

Retail Class R (USD)

ISIN	IE00BZ127Z37
AMC ² /OCF ³	1.10%/1.70%

¹Fund information is for Retail Class R (USD).

²The Annual Management Charge (AMC), is a charge taken from the fund. The charge is expressed as a percentage per annum but is normally taken daily from the fund and is calculated based on the value of funds under management. Normally the fund manager reserves the right to review the level of charge.

³The Ongoing Charges Figure (OCF) is made up of the Annual Management Charge (AMC) and other operating costs. If the investment is not denominated in your local currency this product is subject to exchange rate risk. The OCF equals the All-In Fee payable to the Manager which is currently fixed and captures all the ongoing operating fees and charges (including those of the underlying CIS) payable by the Fund. In case the actual ongoing operating fees and charges exceeds the amount of All-In Fee, the excess will be borne by the Manager.

COMMENTARY

Developed world central banks remained hawkish, while emerging economies such as Brazil and China saw interest rate cuts aimed at boosting economic activity.

US equities lost 1.8% (S&P 500), the first monthly drop since February, while the EuroStoxx 50 Index fell 3.9%. Japan (TOPIX +0.4%) bucked the downward Asian trend, with greater China indices seeing sharp falls (MSCI China -8.5%; Hang Seng -8.5%).

month. Asian and Emerging market equity holdings were the main detractors, weighed down by further concerns in the Chinese property sector

The fund fell in August on the back of weak global equity markets with most markets generating negative returns for the period. AB American Growth and AXA IM US Enhanced Index Equity had the noticeable contribution to performance for the period benefitting from a recovery in growth-oriented stocks in the latter part of the
